PROFESSIONAL SUMMARY

Java Backend Developer with a Bachelor's degree in Information Technology and hands-on experience developing Java-based, database-driven applications through internship, academic, and freelance projects. Skilled in Core Java, Object-Oriented Programming (OOP), JSP, Servlets, JDBC, Spring Framework, Hibernate ORM, MySQL, SQL, RESTful APIs, Git, and GitHub. Experienced in backend application development, CRUD operations, database integration, API integration, automation, debugging, and software development lifecycle (SDLC) practices. Seeking an entry-level Java Developer / Software Engineer role.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C#, JavaScript, HTML, CSS

Core Java & CS: Core Java, Object-Oriented Programming (OOP), Data Structures and Algorithms, Exception Handling, Problem Solving

Backend & Web: JSP, Servlets, JDBC, Spring Framework (Core, JDBC, ORM), Hibernate ORM, RESTful APIs, API Integration

Database: MySQL, SQL, Database Management Systems (DBMS), CRUD Operations

Automation & Development: Selenium WebDriver, Java-based Automation, Software Development Lifecycle (SDLC), Agile

Tools & IDEs: Git, GitHub, IntelliJ IDEA, Eclipse, NetBeans, Android Studio

Additional: Android Application Development (Java), Debugging, Unit Testing, Teamwork, Communication, Adaptability

PROFESSIONAL EXPERIENCE

Software Development Intern — *ProgrammersTech* | Remote | Jul 2024 | 1 Month

- Contributed to a Banking Management System using Java, JDBC, and MySQL, including account handling and transaction record processing.
- Assisted in developing a Library Management System for book records, member details, and issue/return tracking with a MySQL database.
- Developed a desktop Calculator Application in Java with standard arithmetic operations and a user-friendly interface.
- Helped design and implement a Student Management System for student records, enrollment details, and academic information.

KEY PROJECTS

LinkedIn AI Auto Apply Agent (Final Year Project)

- Built an AI-powered job application automation tool using Java/Python that searches job listings, matches jobs against candidate profiles using rule-based logic, and automates application workflows.
- Implemented backend functionality using Java Servlets, JSP, JDBC, and MySQL for user, job, and application data management.
- Integrated job-search/API data and developed profile/CV processing and job-matching functionality.
- Used Selenium WebDriver for browser automation of LinkedIn Easy Apply workflows, reducing manual application effort.

University Admission System

- Developed a Java-based application to manage student admission workflows including applicant registration, document verification, seat allocation, and record maintenance using MySQL.

EShop Management System

- Created an e-commerce management application for product catalog management, inventory tracking, and order processing using Java, JDBC, and MySQL.

EDUCATION

Bachelor of Science in Information Technology (Honors) | 2022 - 2025

University of Sindh, Jamshoro

Intermediate | 2020 - 2021

Phoenix Higher Secondary School & College

LANGUAGES

English, Urdu, Sindhi
